SKILLS

FRONTEND

- Html
- CSS
- JavaScript
- ReactJS

BACKEND

- NodeJS
- REST API
- MongoDB
- Java

TOOLS

- Git and GitHub
- Postman

EDUCATION

SSLC

Devangar Hr Sec School
2017-2018

HSC

SSM Matric Hr Sec School
2019-2020

B.E ELECTRONICS AND COMMUNICATION

Kongunadu College Of Engineering
and Technology
2020-2024

CERTIFICATION

Simplilearn

Introduction to Front End
Development

Postman API

Postman API Fundamentals Student
Expert

PROFILE

Enthusiastic Full Stack Developer with expertise in ReactJS, HTML, CSS, JavaScript, NodeJS, and MongoDB. Experienced in building responsive web applications, including a Nike showcase and movie ticket booking platform. Skilled in collaborative projects and API integrations to enhance user experiences.

PROJECTS

Nike Product Showcase Website

ReactJS, Tailwind CSS

- Developed a front-end application for movie ticket booking using ReactJS. Designed an intuitive interface for selecting seats, calculating ticket costs, and managing user selections.
- Implemented real-time cost calculation, seating layout, and ticket booking confirmation.
- Enhanced user experience with a clean, interactive layout. Gained expertise in state management and user interface optimization for performance.
- Strong understanding of software development methodologies.
- Able to fit in well within an informal start up environment and to provide hands-on expertise.

HOUSEFULL - Movie Ticket Booking Application

ReactJS

- Developed a front-end application for movie ticket booking using ReactJS. Designed an intuitive interface for selecting seats, calculating ticket costs, and managing user selections.
- Implemented real-time cost calculation, seating layout, and ticket booking confirmation.
- Enhanced user experience with a clean, interactive layout. Gained expertise in state management and user interface optimization for performance.
- Entrepreneurial drive, demonstrated ability to achieve stretch goals in an innovative and fast paced environment.
- Collaborate with cross-functional teams to define, design, and ship new features.

MovieLander

ReactJS

- Created a dynamic movie search application in ReactJS using the IMDb API. Users can search for movies and retrieve information such as titles, posters, and release years.
- Integrated API calls to fetch live data, search functionality with error handling, and streamlined data rendering.
- Improved API integration skills and boosted understanding of frontend data handling. Enhanced user engagement by providing a seamless movie search experience.
- Excellent problem-solving and analytical skills.
- Work with outside data sources and APIs to integrate with backend services.
